WELCOME TO OUR WORLD

Since our inception in 2015, the heavy lift specialists of the UNITED GROUP have emerged as pacesetters in heavy lift shipping. We launched four dedicated divisions, formed major international partnerships, and have grown a state-of-the-art fleet to become global leaders in the heavy lift sector.

The UNITED GROUP is a suite of established stand-alone companies, working in close cooperation to offer industry-leading competence, experience, and know-how in their respective fields of business. Our mission is to ensure long-term business relationships through customer satisfaction.

United Heavy Lift GmbH & Co. KG focuses on the ocean transport of heavy and oversized project cargoes and successfully serves shippers from various industries. With over 20 vessels, UHL operates one of the youngest and most environmentally friendly MPP heavy lift fleets on the market.

United Wind Logistics GmbH operates a fleet of three specialized deck carriers and offers fully integrated logistic concepts for the offshore wind industry. UWL specializes in the ocean transport of offshore wind components such as blades, nacelles, towers, and foundations.

United Engineering Solutions GmbH is the engineering arm of the UNITED GROUP. The company is comprised of over 30 naval architects, marine engineers, and port captains who provide a range of sophisticated technical ocean transport solutions to both their sister companies and external clients.

United Heavy Transport GmbH focused on providing fully integrated solutions and consulting services for maritime transport and project management. Our network of long-standing, trusted partners, paired with a strong in-house engineering and project management performance, enables us to provide turnkey solutions to our customers.

In July 2024, the naming ceremony for the newbuilding MV UHL FABLE took place in Hamburg, Germany.

” As a privately-owned enterprise, we offer great flexibility in the way we plan and execute the ocean transport of your cargo

United Heavy Lift is one of the leading providers of ocean transport services for heavy lift, breakbulk, and project cargo. Our services include chartering, cargo operations, project management, technical supervision, engineering solutions, and an in-house crewing department.

Our team consists of over 140 highly skilled onshore employees and 250 employed seafarers, ensuring smooth ocean transport and cargo operations from offices around the globe.

OUR MISSION

” Our mission is to ensure long-term business relationships through customer satisfaction

At the UNITED GROUP, we believe that customer satisfaction is achieved by always striving to exceed the expectations and requirements of our customers. It is this commitment to service excellence and to customer service that forms the foundation of our long-term relationships. Integrity, honesty, trust, innovation, and responsibility are the basic elements of our core values and set the standard for our daily activities.

The UNITED GROUP companies operates a management system certified in accordance with the applicable versions of ISO 9001, 14001, and 45001.

F900 ECO-LIFTER CLASS

At the heart of the United Heavy Lift fleet are nineteen F900 Eco-Lifter sister vessels (built 2018-2024), which raise the standard for environmentally friendly breakbulk and heavy lift shipping. The F900 Eco-Lifter class was designed and built based on the latest and most fuel-efficient propulsion technology. The carbon footprint of the F900 Eco-Lifter class is 30-50% less compared to the existing heavy lift fleet in the market. This makes the vessels one of the most modern and eco-friendly MPP tonnage in the industry. They also offer shallow draft, allowing us to call smaller and more remote ports. With adjustable tweendecks and box-shaped cargo holds, the F900 Eco-Lifters are ideally situated to accommodate voluminous and heavy cargo.

United Heavy Lift operates a fleet of over 20 modern heavy lift vessels with lifting capacities ranging from 160 to 900 mtons.

DECK CARRIERS

With a deadweight of 10,000 mtons, a deck length of 128 m and width of 28 m, the modern deck carriers MV BoldWind and MV BraveWind offer great flexibility and attractive intake for any large and heavy cargo. The vessels (both built in 2020) combine an optimized hull design and diesel electric propulsion to suit their dedicated service field. The electric package is powered by four diesel generators driven by high quality MDO. The vessels comply with IMO Tier III emission regulations and are additionally equipped with a selective catalytic reduction system.

United Wind Logistics operates a fleet of three modern deck carriers.

**SEE OUR
FLEETLIST**

” We are committed to training and retaining heavy lift experts on board the vessels to realize the full potential of our fleet. A highly motivated and dedicated team, willing to go the extra mile and continuously looking for creative solutions, is an essential part of the success of any project

CARGO FLEXIBILITY

” The F900 Eco-Lifter vessels combine spacious, adaptable cargo holds with shallow draft - ensuring flexible operations for heavy cargo and access to remote ports

PHOTO: IAN COTTA

PHOTO: UHL

United Heavy Lifts Crewing Department works exclusively for the UNITED GROUP fleet. We are committed to developing and retaining heavy lift experts onboard the vessels to realize the full potential of our fleet. We believe in the benefits of recurring crew assignments on the same vessels. We foster the exchange of knowledge and the sharing of best practices. A highly motivated and dedicated team, willing to go the extra mile and continuously looking for creative solutions, is an essential part of the success of any project. United Heavy Lift supports local maritime training and offers cadet positions for graduates of German maritime universities on board our fleet.

RENEWABLES

OIL AND GAS

United Heavy Lift transported 70,000 freight tons of subsea equipment for McDermott's Scarborough LNG Project in four voyages from Indonesia to Australia.

UHL PROJECTS

” Nineteen F900 Eco-Lifter sister vessels provide high planning reliability and let your project run like clockwork

PHOTO: UHL

UHL PROJECTS

Project: Noirmoutier OWF in 2024 Scope of Work: Ocean Transportation of 61 TPs - weighing up to 430 mtons - Transported in 16 Voyages on one dedicated Vessel with 6m pedestal Crane Boom extension UHL Fresh from Flushing, Netherlands to La Rochelle, France - Entire engineering package including sophisticated grillage design and seafastening - dedicated project team.

PHOTO: UHL

Project: Pile Cluster for Hugin A and Vallhall Projects in 2024 | Scope of work: United Heavy Lift transported four pile clusters (3,096 mt, CoG 9–10 m above deck), the heaviest deck load of the campaign, in August 2024 from Dubai, UAE to Verdal, Norway on the F900 Eco-Lifter UHL FORCE. The F900 fleet enables up to 3,100 mt on deck, ensuring flexibility and schedule reliability. Scope included full grillage and sea fastening engineering, with on-site support at load and discharge ports.

” There is a strong demand for alternative energy sources throughout the world. United Wind Logistics is proud to be part of the supply chain that provides green energy to the stakeholders involved

UWL PROJECTS

” United Wind Logistics is your specialist partner
for large offshore wind projects

Project: Cyclades IV | Transport of an offshore cable weighing nearly 5,000 tons loaded at the Prysmian facility in Pikkala, Finland and discharged directly to the cable installer MV Giulio Verne in Heraklion, Greece | The engineering scope included assessing the structural integrity of the vessel, weather routing using our on board installed Octopus system as well as ballasting sequences during spooling and unspooling operation.

PHOTO: HERMANN DISELING

Transport of Monopiles from Navantia yard in Fene, Spain to Moray West site in Invergordon, UK | Ocean transport and seafastening concept for the MP's weighing up to 2,000mt, a diameter of 10m and a length of up to 90m | The engineering work included the design and manufacturing of the custom-made grillage, the seafastening, structural integrity of the vessel, voyage planning incl. weather routing as well as ballasting analysis for RoRo operations.

The strength of the UNITED GROUP is also attributable to the engineering capabilities offered through United Engineering Solutions. Through the engineering arm of the UNITED GROUP, we have access to a team of over 30 naval architects, marine engineers, and port captains who provide a wide range of engineering solutions to our clients. United Engineering Solutions offers heavy cargo and structural engineering, vessel modification, naval architecture, 3-D CAD animations, mobilization and supervision, sea transport consultancy and port captain services, among others, to ensure that each voyage is flawlessly planned and executed. State-of-the-art hydrodynamic assessments, such as vessel motion response analysis, are performed as needed to provide a basis for seafastening and grillage design, as well as for fatigue assessments and related voyage planning.

PHOTO: HERMANNUSSELING / ADMAREN

PHOTO: UHL

” UES offers customized engineering solutions to ensure that every project is becoming a success

” The UO7 agency network is all about providing our clients with the benefits of our large combined fleet and combined expertise

PHOTO: UNITED 07

With their strategic collaboration, United Heavy Lift and Ocean7 Projects cover all market segments of the heavy lift industry, offering clients an even larger and more diverse total fleet of around 50 vessels and enabling the transportation of an even wider range of cargo. By combining their expertise and experience, they provide comprehensive solutions for complex project requirements.

Working in a **large agency network** is about providing a seamless response to clients with complex projects. The joint service aims to increase transportation efficiency by reducing the number of vessels needed and the number of individual trips required. As a result, we can offer a wide range of ocean transport solutions in one coordinated action.

The two ocean transport specialists joined forces in 2019 and have since opened offices in Kuala Lumpur (with subdivisions in Beijing, Shanghai, and Tokyo), Singapore, Dubai, Houston, and Genoa under the United O7 brand.

SUSTAINABILITY HIGHLIGHTS

Decarbonization and emission reduction

NET - ZERO
2050

The UNITED GROUP is targeting to aim for net-zero emissions in its maritime operations by 2050 with interim energy intensity targets.

Alternative fuel concepts

BIOFUEL BUNKERED
1,600 TONS

In 2025, bunkering 1,400t of B100 and 200t of B24 enabled nearly 10% biofuel use and early FuelEU Maritime compliance.

Data protection

BREACHES, THEFTS, LOSS
0

With 0 data incident in 2025, we remain committed to enhancing data protection and security

Support the green transition

RENEWABLE CARGO
67%

Over the past few years, we have increased the share of renewable cargo booked to 60% and the renewable cargo volume in US dollars to 67% for the 2025.

Learning and growth

COURSES COMPLETED
454

With 454 training courses completed in 2025, our teams actively expanded their skills and expertise throughout the year

Employee satisfaction

JOB SATISFACTION
48.2 eNPS IMPROVEMENT

As a result of the annual employee survey, the employee Net Promoter Score (eNPS) improved from 44.0 in 2024 to 48.2 in 2025 (+4.2 points), indicating a positive development in overall employee engagement.

Environmental performance

0 SPILLS

No hydrocarbon or chemical spills to water were reported from the United Heavy Lift fleet in 2025. All vessels comply with the Ballast Water Management Convention's D-2 standard.

Safety awareness

NEAR MISSES REPORTED
414

With 414 Near Misses reported in 2025 (+37% compared to 2024), we significantly increased the numbers, reflecting a continued improvement in reporting behaviour and safety awareness

External assessment

ECOVADIS-
GOLD
RATING

In the most recent EcoVadis sustainability assessment, United Heavy Lift improved its rating from Bronze to Gold. The EcoVadis rating supports customer and market sustainability & ESG expectations and serves as independent external feedback and acknowledgement for our performance.

SUSTAINABILITY APPROACH

DECARBONIZATION OUR GOALS Ambition to decarbonize our fleet and reach net-zero by 2050 Help our customers to reach their decarbonization goals Support shipping industry decarbonization initiatives Support SDG 13 OUR ACTIONS Create full emission data transparency Set emission reduction targets across all scopes and reduce emissions Provide best-in-class energy efficient transport solutions Develop low-carbon solutions for our customers		OUR PEOPLE OUR GOALS Be the employer of choice in the maritime heavylift Industry Support SDG 5 Support SDG 8 OUR ACTIONS Maintaining an engaged workforce Drive diversity and equality across our teams THE UNITED GROUP AS A SUSTAINABILITY LEADER		HEALTH, SAFETY, ENVIRONMENT, AND QUALITY OUR GOALS Ensure a safe workplace for our people Uphold our high environmental standards Achieve quality in everything we do Support SDG 14 Support SDG 8 OUR ACTIONS Ensure a safe onshore and offshore environment Protect the environment Provide highest quality service to clients	
RESPONSIBLE BUSINESS		OUR GOALS Make sustainability an integral part of how we work Ensure that our core values are upheld by our suppliers Live by our Code of Conduct through ethical and responsible business practices		OUR ACTIONS Uphold a clean track sheet of ethical business practices Establish and maintain a robust ESG governance structure Ensure sustainable procurement	

SEE THE
LATEST REPORT

CODE OF CONDUCT

The UNITED GROUP is committed to the highest standards of ethical business conduct and integrity. We have a consistent compliance policy across all our companies and offices globally and our Values and Code of Conduct are issued to all staff. This represents our clear statement and commitment to ethical business practices internationally. These standards are mandatory and must be followed at all times.

- | | | | |
|------------------|------------------------|--|--|
| Anti-corruption | Freedom of association | Gifts and benefits policy | Equal treatment and non-discrimination |
| Fair competition | Human and labor rights | Occupational health and safety | Compliance with applicable laws, ordinances, and rules |
| | | Data protection and information security | Sustainability and protection of environment and climate |

HSEQ

” The UNITED GROUP is committed to apply the highest level of health, safety, environmental, and quality standards to all ocean transport projects we are entrusted with. We encourage everyone to take part in this safety culture, which is based on clear and visible leadership

We manage and control our projects through our Health, Safety, Environmental, and Quality Management System (HSEQ), which is used in all offices and on all vessels. We think before we act. Our activities are planned, organized, and performed in a safe and environmentally-friendly manner from the management top down to the employees and the crew on board our vessels. **Safety starts with you and me.** Our HSEQ policies are supported by in-house, experienced, and qualified specialists who ensure that the movement of our clients' goods are managed without damage to the environment, without hazard to personnel, and without risk to the cargo or vessel. Each voyage method work statement includes its own detailed section on HSEQ including a voyage specific risk analysis.

United Heavy Lift, United Wind Logistics, United Heavy Transport and United Engineering Solutions operates a management system certified in accordance with the applicable versions of ISO 9001, 14001, and 45001.
